There has been known an analyzing system wherein information relating to an analysis can be confirmed through an inter-net (web site, E-mail) or the like at a position away from a place where an analyzing apparatus main portion is installed (For example, refer to Citations 1 and 2). Therefore, there is no difficulty in using the analyzing system as a material testing machine.

Incidentally, since a information regarding a remote-command system using an inter-net is described in Citation 3, refer to it if necessary.
